THERMO ACTIVE®
ThermoTherapy Bracing

Item No. 6012

Ankle System

PRODUCT FEATURES

1 New Centered 'Valve' Placement
- Easier for patients to attach and remove the Compression Pump

2 Removable Medical Grade Gel Packs
- Freeze or chill for deep cold therapy as required
- Microwave for deep heat therapy as required

3 Built-in Compression with Hand Pump
- Ensures 'total contact' with all patients shapes and sizes
- Our pneumatic compression helps limit edema and insures uniform cold or heat therapy
- Hand compressor bulb makes adding or modifying pressure quick and easy
- Provides the deepest cold/heat therapy available

4 Includes One Pair of 'Extender Straps'
- Easy to attach straps add up to 10" of circumference
- Allows one size brace to fit the majority of your patients
- Can be quickly and easily modified for patient changes, swelling or weight gain

5 Soft, Durable, Washable Anti-Microbial Outer Fabric

Anatomically Designed - Removable Cold/Hot Gel Pack

Extender Straps
can add up to 10" of circumference to the brace

Hand Pump Compression
permits 'Total Contact' for individual contours

LSO High Back System

PRODUCT FEATURES

1 New 'Floating D-Rings™' for Maximum Fitting Options
- 'D-Rings' can be moved to any position needed and consistently provide ideal strap placement
- Enhances function and comfort for all patients
- May be easily angled for pendulous stomachs
- Fits circumferences up to 65" (with Extender Straps)

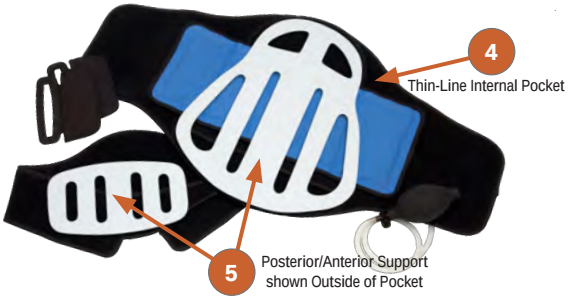
2 Removable Lumbar ThermoTherapy™ Gel Pack
- Freeze or chill for deep cold therapy, if required
- Microwave for deep heat therapy, if required
- Provides total contact and enhanced comfort
- The LSO can be used with or without the gel pack

3 Built-in Lumbar Compression Panel with Hand Pump
- Compression enhances the benefit of the Cold / Hot therapy when in use
- Delivers total contact via the compression feature for all shapes and sized patients

4 New Thin-Line Internal Pockets hold the Moldable Supports
- Newly designed posterior and anterior pockets hold the thermoformable plastic supports securely in place - after molding to the patient shape

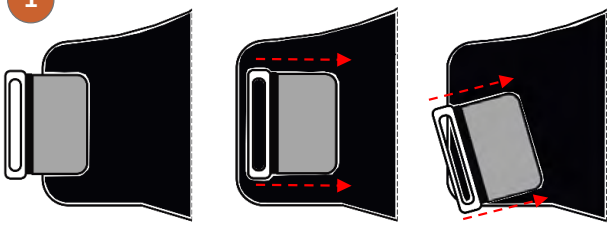
5 ThermoFormable Plastic Posterior and Anterior Supports
- Moldable at low temperature for exact patient fitting
- Easy adjustments, if required

6 One Pair of 'Extender Straps' Included at no Extra Charge
- Easy to attach straps add from 10" to 20" of circumference
- Allows one size LSO to fit the majority of your patients



'Floating D-Rings' are moveable and can be placed in varying positions on the brace for a perfect fit

1



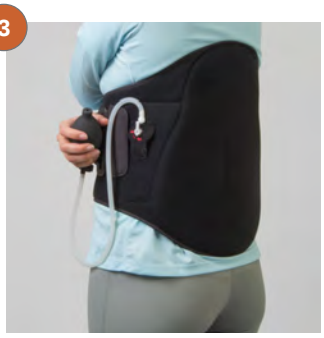
(A) Outside placement for average sized patients

(B) Inset for smaller patients

(C) Angled for use on pendulous abdomins

Built-in Lumbar Compression Panel with Hand Pump

3



Extender Straps can add up to 10" of circumference when attached to the anterior strap

Shoulder System

PRODUCT FEATURES

1 Built-in 'Perfect-Fit' Shoulder Compressor with Hand Pump
- Full shoulder compression section accommodates any patients shape, anatomy or size with uniform 'pneumatic' compression
- Easy to adjust and modify pressure with the hand 'bulb' compressor
- Provides full contact with our Gel interface for a uniform and deep cold (pain relief) or hot (comfort/circulation) therapy treatment

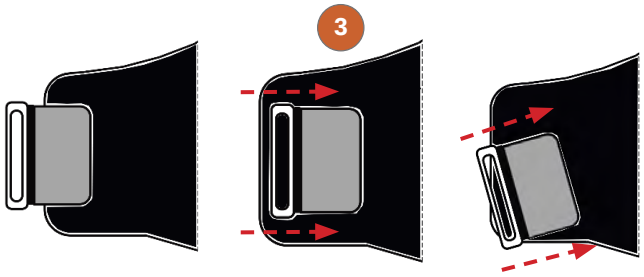
2 NEW full coverage, removable Cold/Hot Gel Interface
- Unique multi-fabric design made from the highest quality materials
- Place in freezer, refrigerator, ice chest (sports) for cold therapy
- Heat in microwave for deep, comfortable heat therapy

3 NEW 'Floating D-Rings' for Maximum Fitting Options
- 'D-Rings' can be moved to any position to provide ideal strap placement
- Enhances function and comfort for all patients
- Easily moved to accommodate changing patient conditions
- Increase circumferences when required

4 NEW Single 'Ez-Fit' Arm Strap for Easy Arm Attachment
- Easy one-handed attachment by patients when necessary
- Fits most patients
- Use the 'extender straps' that are included to fit the largest patients

5 Includes One Pair of 'Extender Straps'
- Easy to attach straps add up to 10" of circumference
- Allows one size to fit the majority of your patients
- Can be quickly and easily modified for patient changes

'Floating D-Rings' are movable and can be placed in varying positions on the brace - for a perfect fitting Body Strap



(A) Outside placement for average sized patients

(B) Inset for smaller patients

(C) Angled for pendulous abdomens

Body Strap may be positioned to control arm movement

Positioned higher to hold the shoulder in position

Positioned lower to hold control the arm position

2 Extender Straps Included
can add up to 10" to arm or body strap - or 20" when used together

L-1832

Range of Motion Knee System (ROM)
- Controls flexion and extension from 0° - 90°
- Removable Gel Pack for cold / hot therapy
- 'Extender' straps add up to 12" of circumference
- Easily adjustable compression ensures total contact and protection
- Ideal for post-op recovery, contractures, severe sprains and strains

L-0631

LSO High Back System (Sacrococcygeal Junction-T9)
- Heat moldable anterior and posterior supports located in New Slim-Line Custom Pockets
- Adjustable lumbar compression section provides total contact and pressure relief
- May be used with or without the gel pack
- New 'Floating D-Rings' provide the perfect fit

L-0627

LSO Low Back System (L1-L5)
- Heat moldable anterior and posterior supports located in New Slim-Line Custom Pockets
- Adjustable lumbar compression section provides total contact and pressure relief
- May be used with or without the gel pack
- New 'Floating D-Rings' provide the perfect fit

L-1686

HIP Orthosis System
- Low Riding Hip Girdle combines function with superior anatomical fit (left and right) which allows for easy bending, sitting and sleeping ... all with greater comfort
- Easy to adjust Flex / Ext / ABD / ADD Hip Joint
- Fully padded with soft, washable, breathable foam
- Includes New 'Cold Relief Sleeve' for cold / hot therapy with the brace on or can be worn separately for patient relief and enhanced healing

L-1810

Polycentric Knee System
- Controls hyperextension of the knee
- Controls excessive medial / lateral movements
- Removable Gel Pack for cold / hot therapy
- Easily adjustable compression insures total contact and protection

L-3670

Shoulder (Left and Right Available)
- Compression section ensures 'total contact'
- New 'Floating D Ring' ensures that the body strap will be both functional and comfortable
- New Single Arm 'Y Strap' for easier application
- Customized cold / hold pack control edema, pain and discomfort
- Ideal for post-op and arthritic patients

L-3908

Wrist with Thumby System
- Controls wrist / hand flexion and extension
- Wide aluminium splint can be bent for fit and function
- Removable Gel Pack for cold / hot therapy
- Easily adjustable compression for total contact and control of motion
- Use for carpal tunnel, severe sprains & strains and post-op

L-3760

ROM Elbow System
- Controls flexion and extension from 0° - 90°
- Removable Gel Pack for cold / hot therapy
- Easily adjustable compression for total contact and protection
- Ideal for post-op recovery, contractures, severe sprains and strains

L-3710

Polycentric Elbow System
- Controls hyperextension of the elbow
- Removable Gel Pack for Cold / Hot therapy
- Easily adjustable compression for 'total contact'
- Controls medial / lateral movement
- Ideal for post-op recovery, contractures, severe sprains and strains
